The work of Brown and Goldstein clearly identified the reason for the high cholesterol. Daniel Steinberg. They only convey the mass concentration of cholesterol molecules within all of the particle subtypes per unit of volume.

Geneticists showed the cause of familial hypercholesterolemia to be a single gene. Steinberg often includes important details from studies that others leave out, but he also often leaves out important details himself, or even whole studies that disagree with his conclusions. Statins are more effective at reducing heart disease simply because they are more effective at reducing cholesterol levels.
