An extension of this process is illustrated in the lower part of Figure 2. PDF Point.

The actinides of light weight have a high valence; for example, oxidations. For the puckered diaminoethane, there are some further observations to make. The shape, or stereochemistry, depends both on the metal and its oxidation state and on the form of the ligand – each contributes in different ways. Selected type: E-Book. Condition: Used: Good. Read full description.
